

Make the switch to Philips energy efficient lighting

Compact Fluorescent Lamps saving up to **80% energy savings** compared with incandescent lamps

As the global leader in advanced and energy efficient lighting systems, Philips fully supports the Australian Government's leadership position on energy efficiency. Announced on June 5th, 2008, the planned four-year phase-out of traditional incandescent light globes has been accelerated by 12 months. The program will begin with a ban on standard incandescent globes from February 2009. This initiative will result in earlier cuts to greenhouse emissions of more than four million tonnes per year*. With Philips new energy saver technology, consumers, business and the environment all benefit.

* Media Release, The Hon Peter Garrett MP, Minister for the Environment, Heritage and the Arts - New Measures Tackle Spiralling Energy Consumption In Homes, 05/6/08.

> Average Lifetime of 6000hrs
 > WW or Warm White lamps produce light similar to GLS lamps for a warm white light
 > CDL or Cool Daylight lamps produce a cool, crisp, whiter light
 > BC or B22 = bayonet cap base. ES or E27 = edison screw base
 > Not recommended for dimmers, except for dimmable model
